

Risk Management on Projects

Course Code PSPM03

Duration 1 Day

About the Programme

Every project carries an element of risk to the business. This should be highlighted, managed and tracked. Without awareness the possible issues in a project, these cannot be dealt with at an early enough stage, or set levels to monitor project risk status.

This workshop will aid individuals to become more aware of risk issues in projects and have tools to be able to review risk situations and deal with them accordingly.

Workshop Content:

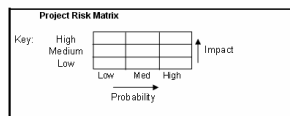

- Levels of Risk
- Effects on Project and Business
- How to identify risks
- Cause and Effect
- Quantitative and Qualitative Risk Analysis
- Monitoring and Controlling risk

Link Document Training:

This module will link to the following Project Management Documents:

- Risk Log
- Opportunity Log
- Issues Log
